### INNOVATION HAPPENS HERE 부RIVIERA

350 TECHNOLOGY DR. PITTSBURGH, PA

# **TABLE OF CONTENTS**

The Facility	1-32
The Ecosystem	33-40
Systems & Specifications	41-52

## **INNOVATION HAPPENS HERE**

At the Riviera, leading life science and digital health companies from around the world come together to uncover cutting-edge solutions for those in need. We provide wet and dry laboratories, research studios and testing space, and other first-class amenities and supportive services to help today's ideas build a better tomorrow.

160k SF Life Science Facility 6 Floors of Office & Lab-Ready Space 1<sup>st</sup> Floor Café, Conference Center and Town Hall

### **DISCOVERY HAPPENS HERE**

The Riviera combines powerful, uninterruptible infrastructure and direct access to world-renowned thought leaders within one building, allowing your discovery to be the next breakthrough.

#### **WET LABS**

For streamlining chemical and biological processes

#### DRY LABS

Where computational analyses are Modeled to simulate physical phenomenon

#### **OPEN OFFICE**

Flexible, over-sized floor plates to support seamless collaboration

#### THE TOWNHALL

Highly visible lecture space for presenting new ideas

### **EXPLORATION HAPPENS HERE**

The Riviera is committed to the exploration of life-changing cures for disease and advancing the human quality of life. The companies formed within The Riviera ecosystem will have unparalleled access to our high-quality support capabilities and tailored programming.

Member of Life Sciences Pennsylvania with Access To Academic & Life Science Thought Leaders

**Connection To Policy Makers** 

Bio Breakfast Networking Series, Frequent Guest Lectures, Complimentary Coffee & Pastries At Events

Access to Thermo Fisher Buying Pool

## **CONNECTION HAPPENS HERE**

Private office and 100% lab-ready workspaces are amplified by shared amenities and dedicated social spaces designed to enhance your workday and foster spontaneous collaboration.

Town Hall with Flexible Event Space

6<sup>th</sup> Floor Terrace with Flexible Event Space Fully-Staffed DeFer Coffee & Tea Café

Fitness Center with Day Lockers & Private Changing Rooms 1<sup>st</sup> Floor Conference Center Available On Demand

Wellness Room

10

WET & DRY LABS CONDITIONED BY TWO WATER COOLED/HEATED 80,000CFM AIR HANDLERS

-----

5

#### **CONFERENCE ROOM** WITH ARRANGEABLE TABLES AND CHAIRS, TV SCREEN, & SOUND SYSTEM

#### **OUTDOOR ACTIVATION SPACE** PERFECT FOR SOCIAL GATHERINGS & GROUP CLASSES

#### TOWN HALL WITH SHARED WORK & SOCIAL SPACES

## **THE CAPITAL OF CURES**

The Riviera is situated in South Oakland, Pittsburgh's innovation district, where the rich history of research and discovery collide with a vibrant biotech startup culture.

**DR. MAUD MENTEN** Michaelis-Menten Equation

DR. MASAHIRO YOSHIDA Masa Valve

**DR. THOMAS STARZL** First Liver Transplant **DR. GEORGE MCGOVERN** Open-Heart Surgery

UPMC Brain-Computer Interface (BCI)

**DR. FREDDIE FU** Sports Medicine Pioneer **DR. JONAS SALK** Polio Vaccine

**DR. PETER SAFAR** CPR Pioneer

#### THE ECOSYSTEM

## LIFE SCIENCES ECOSYSTEM

Pittsburgh Technology Park is in the South Oakland neighborhood, the innovation district of the city. The local ecosystem includes over 150 companies, world-class universities, incubators, support organizations, and top-rated hospital systems.

THE ECOSYSTEM

## **TRANSIT & AMENITIES**

The Riviera is located in Pittsburgh Technology Park, the region's premier R&D hub built on 48 acres of former industrial land.

2 Miles to Downtown Pittsburgh

Easy highway access towards Pittsburgh International Airport

Strategically located on the 56, 57, 58 bus lines

Easily accessible by bike

1.5 Parking Spaces per 1,000 RSF in the Adjacent Garage

**AVAILABILITY** 

6TH FLOOR **14,746 SF** 

3RD FLOOR **31,725 SF** 

# 5TH FLOOR

2ND FLOOR **31,800 SF** 

4TH FLOOR **16,270 SF** 

1ST FLOOR **3,208 SF** 

## **TECHNICAL HIGHLIGHTS**

#### **CUSTOM COOLING & HEATING SYSTEM**

Space can be conditioned by two water cooled/heated 80,000CFM (160,000CFM total) air handlers.

#### ENHANCED ELEVATORS

All elevators have been upgraded with UV air purification system. The building is equipped with two normal service elevators and one freight elevator.

#### **READY-TO-WORK EXHAUST SYSTEM**

All risers and fume exhaust systems installed for tenant lab plug and play with N+1 redundancy.

#### **UPGRADED HVAC SYSTEM**

Air handlers equipped with MERV-14 filtering, specifically designed for lab use loads and outside air requirements.

41

#### **BACKUP GENERATOR ALLOCATION**

Existing diesel power life safety backup generator for tenants to tie all life safety related items into. Structural steel infrastructure and natural gas main is in place on the roof to allow for easy installation of future tenant backup generators.

#### **ALL-NEW UTILITIES**

New 120/208V electric service for tenant floors and new 277/480V service for larger equipment. Electrical service capacity to the building is fed from two separate transformers, sized for lab use.

#### **BIOSAFETY ROOM**

This enclosed laboratory storage facility is located on the first floor directly adjacent to the building loading dock. Waste is picked up as needed and properly handled and disposed of by tenant vendors See Systems & Specifications for full specifications.

#### **SYSTEMS & SPECIFICATIONS**

## HVAC

#### **COOLING SYSTEM**

The building has a centralized water-cooled chiller plant located on the roof. Cooled water is fed from the Chillers to the rooftop hair handlers. Supply and return air duct risers run throughout the core of the building with taps on each floor for plug and play use by tenants. The chillers, pumps, and air handlers are set up in an N+1 configuration.

#### **HEATING SYSTEM**

The building is heated from low-pressure steam boilers located within the 1st floor mechanical room of the building. The heat from the steam is converted to hot water pumped to the rooftop air handlers. Supply and return air duct risers run throughout the core of the building with taps on each floor for plug and play use by tenants. The boilers, pumps, and air handlers are set up in an N+1 configuration.

#### **OUTSIDE AIR VENTILATION SYSTEM**

The building will have central heat recovery outside air units located on the roof. The tenant floors will be provided with outside air supply and general exhaust air. Capped outlets will be left at the core of each floor for tenant connection.

#### FUME HOOD EXHAUST SYSTEM

The building has a central fume hood exhaust system with centralized exhaust fans located on the roof. The fume hood exhaust fans are cannon type with N+1 configuration, backed up by dedicated 200kW natural gas emergency stand-by generator. Stainless steel, fully welded exhaust shaft runs through the core of the building with taps on each floor for plug and play use by tenants.

#### **SYSTEMS & SPECIFICATIONS**

## **ELECTRICAL**

### **ELECTRICAL SYSTEM**

The Building is equipped with utility company provided electric service.

Two (2) utility (Duquesne Light) owned transformers (existing) will serve all lab and office floor 120/208V and 277/480V loads.

New 277/480V distribution exists to serve the HVAC equipment required for the lab and lab-ready floors. Each transformer serves one 4000A MSB and one 2000A MSB.

### 120/208V LOADS

Existing bus duct distribution to bus plugs on each floor to serve office floor lighting and utility loads, local floor HVAC, normal power lab loads, and optional standby generator loads.

### 277/480V LOADS

Installation of electrical distribution sized to service all new mechanical equipment within tenant spaces.

## ELECTRIC CURRENT DISTRIBUTION FOR LAB USE VS OFFICE USE IS DESIGNED TO PROVIDE:

### WET LAB:

Lighting: 1.8 W/square foot

Receptacles: 15 W/square foot

Mechanical Equipment: 3 W/square foot

### **GENERAL OFFICE:**

Lighting: 1.3 W/square foot

Receptacles: 2 W/square foot

Mechanical Equipment: 1 W/square foot

## **TELECOMMUNICATION**

## **POINT OF ENTRY (POE)**

There is telecommunication infrastructure from street to 1st floor building telecom room.

## **TELECOM CLOSETS**

There will be one base building technology closet on each floor for all base building network connections.

## MAIN BUILDING TELECOM ROOM

The main building telecom room is located on the first floor and houses all carrier equipment and base building head-end equipment. Carriers already wired into the building include Verizon, Comcast, & Crown Castle.

### **TECHNOLOGY RISER**

There is a technology riser located within the core telecom room which runs up the building through each technology closet located on each floor. Each riser has four (4) 4" conduits.

## **TENANT CARRIER SERVICES**

Tenant shall be responsible for pulling telecommunication cabling from the 1st floor telecom room, telecommunication closets and distribution points.

## **FIRE PROTECTION**

#### **INCOMING SERVICES**

Two (2) new 6-inch incoming services and associated backflow preventers.

#### **FIRE PUMP**

One (1) new 750 GPM fire pump sized to serve the building's combined sprinkler/standpipe system.

### **SPRINKLER CONTROL VALVE ASSEMBLIES**

New valve assemblies installed at the existing standpipe in Stair A on each floor. New drain riser installed to allow for sprinkler system drainage and testing. Sprinkler system shall be designed to meet all applicable codes.

#### **FIRE ALARM**

The fire alarm system and installation will comply with the latest City of Pittsburgh Building Code and all other applicable governmental codes.

## **PLUMBING**

The entire installation will comply with the 2017 Plumbing Code of Allegheny County and all other applicable governmental codes.

### **DOMESTIC WATER SERVICE**

New 6-inch incoming water service and associated backflow preventer sized to accommodate all office, lab, and lab-ready floors

### **SANITARY AND STORM POES**

Connections to the municipal storm and sewer system are existing.

### **SANITARY SYSTEM**

Sized to accommodate all plumbing fixtures on office, lab, and lab-ready floors.

### **STORM SYSTEM**

Gravity drainage system sized to serve all roof and terrace drains.

## **STRUCTURAL**

### **FLOOR TO FLOOR HEIGHT**

1st Floor: 14' 6" slab to deck 2nd - 5th Floors: 13' 6" slab to deck 6th Floor: 15' slab to deck

Actual ceiling potential heights will vary based on structural steel and ductwork layouts

#### **FLOORPLATES** 22,884 SF - 23,758 SF

#### **STRUCTURAL CAPACITY** 100 PSF live load
